Time Out says

Not many menus we've read come with a warning label, but Church & State wants diners to know that a few of the ingredients in its special Valentine's Day prix-fixe menu may "affect your love life, hormones, brain chemistry, energy & increase blood flow." Let's hope you experience those pleasant effects when you try selections featuring gastronomic aphrodisiacs like chilled oysters, black winter truffles, and artichokes (who knew, right?). You can also add a wine pairing for \$50.
